

Jennifer Sadler – Artist Statement

A strange landscape as viewed through 12 year old eyes....
Exotic and curious
With the sky so vast and light,
Unending,
Harsh.

Essentially, I am drawn to the Australian landscape and my relationship to it, whether it be through a sense of connection or even alienation.

I find inspiration not only in elements of pattern and texture, but also the unlimited colour combinations that can be found.

However, it is the light and impression of space which is so typical of the Western Australian landscape that ultimately captures my attention and as a consequence creates a feeling of expansion.

I endeavor to capture this sense of expansion within my work.
